Foam, carbon dioxide (CO<sub>2</sub>), powder.
- not recommended:  
do not use water jets (stick jets) for extinguishing fire since they could help to spread the flames.

**Specific hazards :** Incomplete combustion and thermolysis produce gases of varying toxicity such as CO, CO<sub>2</sub>, various hydrocarbons, aldehydes and soot. These may be highly dangerous if inhaled.

**Protective measures for firefighters :** Insulated breathing apparatus must be worn in confined premises with heavy concentrations of fumes and gases.

Floating absorbant material, then mechanical recovery.  
If the product is spilled in a river or in the sewers, notify the authorities of the possible presence of surface effluent.

### 7. HANDLING AND STORAGE

**HANDLING :**

**Prevention of user exposure :** Ventilate extensively if the formation of vapours, fumes, mists or aerosol is a risk.  
Make all the necessary arrangements in order to reduce exposure risk, notably to products in use or to wastes.  
Keep away from combustible substances; keep away from food and beverages.

**Prevention of fire and explosion :** Empty containers may contain flammable or explosive vapours.  
There is a fire hazard associated with rags, paper or any other material used to remove spills which become soaked with product.  
Avoid accumulation of these: they are to be disposed off safely after use.

**Precautions :** Avoid static electricity build up with connection to earth.  
Set up machinery and equipment so as to avoid the risk of accidental spills or splashes onto hot machine parts and electrical contacts (on joint failure, for example).

**STORAGE :**

**Technical measures :** Make the necessary arrangements to prevent water and soil pollution.
